

Historic Environment Record [HER] SURVEY OF MALVERN

A team of volunteers from Malvern Civic Society continue to help Louisa from RDA with the 'Buildings of Worcestershire' Worcester Archaeology and Archive HER Survey Project of Malvern. Louisa volunteered her services for this project and leads the Survey Team. The map shaded blue shows the parish covered. The team have been working on this Survey since October 2013 approximately once a week and have covered two thirds of the Town.

The first port of reference is the Ordnance Survey Town Plan from 1885. An up to date map provided by Worcester Archaeology and Archive HER Department based on the OS Grid squares has red dots indicating where original buildings may still be in 2013-2015. These then are photographed from the public highway and a brief architectural description is written by the volunteers, historians and retired architects and others who have had training by RDA. The data is collated by Louisa and sent into the HER Dept in Worcester to upload onto Heritage Gateway. So far approximately 1,500 have been processed
